

# European Project Design

## Brussels

### TARGET GROUP

Private and public decision makers, interested in operating in the European market in a dynamic way.

Participants are suggested to get some familiarity with the web portal of the European Union before starting the course (<http://europa.eu.int>).

### TEACHERS

Experts in European Public Procurement

### TRAINING OBJECTIVES

The course on European project design intends to offer information and methodological instruments useful for taking part in governments and decisional processes, with reference to methodologies of setting the European policy agenda and implementing European policies.

The objective of this training activity is to encourage the identification, access and use of European funding programmes, through the creation of interactive thematic laboratories with the concrete involvement of Institutional officers.

The training planning is composed of two training days. During the course, the main funding programmes and their future orientations will be described, as well as the main difficulties and challenges that a decision maker is likely to face before deciding to participate in a European funding programme.

The entire initiative will be highly operative, thanks to the constant presence of officers of the European Commission and to the limited number of trainees..

#### Dates and location of the training events

All the training events will take place in **Brussels - Belgium**

**The next events are scheduled on:
